
Christina Bui - High School Stem Cell Research Intern June 2013

The CIRM Creativity Awards support summer internship programs that introduce high school students to stem cell science and foster the next generation of scientists. This year, we decided to let the students tell their own stories about life in the lab and their hopes for the future. During the course of their internships, we've asked them to submit YouTube videos as well as Instagram photos and a blog about their experience. We'll be posting the interns' video at the beginning and end of their internships.

=====

CIRM June Video

- o The name of your lab's principal investigator: Theo Palmer, Stanford University
- o The name of your high school: Piedmont Hills

Brief description of the video clip: This video is a brief overview of my experience so far working at the Palmer Lab at Stanford.
